Subject : **Action from SPC**

During the latest SPC meeting in February, the ESA Executive was given the action to present at the next (mid-May) SPC meeting an information note detailing the commitment of each participating national funding agency to the FIRST and Planck Payloads. This means the list of tasks and deliverables for each instrument and the corresponding institutes supplying it.

I would therefore like to ask you to update the data you already provided in July 1998 for the first meeting with delegations. We will use that as a basis for the paper. Cost data are not planned to be given in the paper and are therefore not required. Given the lead times for such papers in our system, I need this update **by 9th April**.

Thank you for your cooperation.

Best Regards,

F. Felici
