Subject: Instrument AIV interfaces

Sir,

In order to improve the efficiency of the exchange of information between industry and instruments related to AIV/AIT,, we would like to have an instrument AIV/AIT correspondent for each instrument. This correspondent will be involved with our AIV teams in information exchanges (mail, phone, ...) aimed to refine/build the instrument/spacecraft common AIV/AIT activities.

Can you complete the following table, preferably by identifying a dedicated AIV correspondent (exchange of information will be copied to project manager), of keeping the project manager as unique contact point.

Main decision related to instrument interfaces will still debated at instrument interface meetings, but dedicated AIV working meeting, and mail forum should take place at AIV managers level.

Thank you for your cooperation.
