Here is a synthesis of the comments received so far on IID-A 3.0 draft 1, indicating our answer, and how it has been taken (or not) into account in draft 2.

(See attached file: Synthesis comments IIDA draft 1.xls)

Can you review it, and if this is necessary, send me your comments, preferably on excel sheet similar to the model above.

I would like to get your feedback on this draft 2 version for mid June (17 at the

latest), in order to compile a clean version for agreement..

I propose a 2 days review of the IID-A end of June in Cannes (Date TBC during week 26: 1st proposal 27/6 Herschel, 28/6 Planck), with one representative per instrument, for the final agreement and signature.

Can you reply to confirm that you agree with this approach, and confirm feasibility of this review meeting end of June

Thank you.
