1 July 2002

Dear Thomas, Glenn, Bernard,

The SPIRE Project Team has reviewed the latest version of the IID-B (SCI-PT-IIDB/SPIRE-02124 2/2 (1 July 2002)). We can endorse this document as a stable baseline which can be used by all parties. As you know, there are a number of outstanding issues on which agreement or clarification is still required. Important amongst these are:

- Thermal interfaces (ECR 9)
- Mass: SPIRE mass is compliant only if SVM vibration levels do not rise above levels in IID-A version 2.
- Following the agreement of the Herschel Science Team, the SPIRE FPU Shutter has now been formally deleted (to be covered by an ECR on this version).

In addition there are a number of minor issues that need to be addressed in the course of normal work.

On this basis, I am happy to sign the document, and I attach a copy of the cover page signed accordingly.

Best regards,

Matt Griffin
Herschel-SPIRE PI
