1. SCOPE

The aim of the present document is to provide a detailed test report of EM DC/DC BOARD P/N DPU-EM-300.00-0 S/N 03 (SPIRE version) to be used to supply the Data Processing Units (DPU version) developed in the framework of the HSO/FIRST program.

The test to be performed according to the Test Procedure [AD 6] are to demonstrate the compliance of the above item to the requirements specified in the applicable document as part of the overall verification program. For the "DPU version" of the DC/DC converter board, only test applicable to "DPU version" must be considered.

4. PARTICIPANTS REQUIRED

4.1 GENERAL

All test will be performed under QA surveillance in accordance with, and following detailed procedure of applicable PA Plan. Start of the Test shall be notified to Prime Contractor and/or Customer as applicable.

4.2 RESPONSIBILITY

The technical responsibility for testing and test results is up to the Engineering department.

QA is responsible for ensuring that all the agreed procedures are carefully observed, that test equipment and instrumentation used during testing is calibrated and within validity date: that the test data sheets are recorded in the Test Report and signed by the operators and QA witnesses, that all non conforming condition and test results are properly documented and notified to the Prime Contractor, and that all requirements of applicable PA Plan, specification and Statement of Work pertaining to the acceptance tests, are fully satisfied.

4.3 QA WITNESS OF TEST AND SIGN-OFF

QA inspector, or its delegate, shall witness the tests described in this procedure in accordance to the requirement specified in the applicable PA Plans.

4.4 NON CONFORMANCE AND FAILURES

Any malfunction/defect which occurs during the test will be processed along the Non Conformance Procedure described in the applicable PA Plans.

4.5 CALIBRATION REQUIREMENTS

All instruments used for testing shall be calibrated.

Evidence of certification shall be provided by a label attached to the instruments itself, showing the calibration date, the expiring date and the signature of the operator.

| | | Pagina 10 di 68 Page of |

5. TEST ARTICLE

The test article consists as in following table:

| Item | Model | Remarks | P/N | S/N |
|-----------------------|-------|-------------|-----------------|-----|
| DC/DC converter SPIRE | EM | DPU Version | DPU-EM-300.00-0 | 03 |

Before starting the test, the P/N and S/N of the test article(s) to be tested shall be recorded on the step-by-step procedure sheets under the table cell "UNIT UNDER TEST".

5.1 DESCRIPTION

The DC/DC board (Push-Pull topologies) must provide a set of supply voltages for to the DPU internal electronics of the payload experiments HIFI, PACS and SPIRE. For the payload experiment HIFI only, the DC/DC board must provide a further external set of supply voltages for the HIFI/FCU unit.

Therefore the board must provide, considering the DPU+PL version, the following two sets of output voltages:

- "DPU-Outputs" to supply the DPU internal electronics
- "PL-Outputs" to supply the payload instrument HIFI/FCU unit.

In the DPU version only the DPU-Outputs shall be provided.

DPU-Outputs and PL-Outputs shall be isolated from primary power side and from each other (except for DPU RTN output that are connected together at board side) as described in [AD5].

The DC/DC board shall switch on automatically when the input voltage is within the range established in [AD5].

5.2 TEST MATRIX

This procedure is applicable to EM, QM and FM models according to the following test matrix.

- Electrical procedure (E)
- Functional procedure (F)

| Procedure Step | TEST | EM | QM | FM |
|----------------|---|----|----|----|
| E1 | Isolation verification | X | X | X |
| E2 | Minimum loads and DC/DC internal power consumption during shut-down | X | X | X |
| E3 | Switching Frequency | X | X | X |
| F1 | Output voltage regulation-Load regulation | X | X | X |
| F2 | Output voltage regulation-Line regulation | X | X | X |
| F3 | Ripple and Spikes | X | X | X |
| F4 | Efficiency and power consumption | X | X | X |
| F5 | Inrush Current | X | X | X |
| F6 | Input Impedance | X | | |
| F7 | Input protection | X | X | X |
| F8 | DPU Output protections | X | X | X |
| F9 | Regulated PL Outputs Protections | X | X | X |
| F10 | Voltage monitors | X | X | X |
| F11 | Temperature monitor | X | X | X |
| F12 | CE on Input Power Line; Frequency Domain, Differential Mode, NB | X | X | |
| F13 | CE on Input Power Line; Frequency Domain, Common Mode, NB | X | X | |
| F14 | Current Ripple, Time Domain, Differential Mode | X | X | |

Tab. 5-3 TEST MATRIX

6. TEST CONFIGURATION

Test set up are described in the step-by-step procedure sheets provided in § 11.

7. INSTRUMENTATION AND TEST EQUIPMENT

The complete list of the instrumentation used during the test shall be recorded in table 7.-1.

The list shall be filled up during tests and reported in Test Report.

| | | Pagina 18 di 68 Page of |

8. TEST CONDITION

- The CI shall be tested in its defined configuration: all electrical loads shall be present and the CI interface function(s) shall be simulated.
- Unless otherwise specified, all measurements are to be performed at the following ambient condition:

| | |
|-------------------|--------------------------|
| Temperature | 25 °C +/- 3°C |
| Relative humidity | between 30 % and 60 % RH |
| Pressure | Ambient |
| Cleanliness | 100000 class |

- All tests, unless otherwise specified, shall be performed internally to CGS laboratories in a proper area. General disposition shall be applied to maximize personnel safety from potential hazards
- Connectors savers shall be used on FM/QM model as applicable to protect the UUT interface connectors.
- Skilled personnel shall be employed
- All used instruments shall meet the necessary accuracy and shall not degrade the UUT performances.

9. TEST DATA SHEETS

The step-by-step procedure sheets are provided in the following pages.

9.1 DATA SHEETS FILLING UP

The following fields of the data sheets:

- UUT DATA (including Model, Item, C.I., S/N)
- Measured value

shall be filled up during the test performances and shall be part of the Test Report together with photographs, sketches, etc. eventually useful to document the test execution/result.

Remarks field shall be used as a minimum to provide, where appropriate, reference to NCRs and PVS.

Test Report reference data shall be added in the relevant field.

Each data sheet (including the attachments) shall be certified by QA stamp and signature together with the Test Conductor signature and date.

| STEP n° | TEST SEQUENCE | | | | | EXPECTED VALUE | MEASURED VALUE | REMARKS | |
| E1 | ISOLATION VERIFICATION | | | | | | | If the board under test is a "DPU Version", only the DPU pins are object of this test. OBJECTIVE: Verification of isolation between each output power return line and between power return lines and chassis. | |
| | The board shall be in OFF condition, disconnected from any cable or test equipment and placed on an insulated table. | | | | | OK | OK | | |
| E1.1 | Verify that DC isolation between each outputs power return lines is higher than 1MΩ (except for DPU output return lines that are tied together at board level) | | | | | OK | OK | | |
| E1.2 | Verify that DC isolation between each outputs power return line and bonding pins is higher than 1MΩ | | | | | OK | OK | | |
| E1.3 | Verify that DC isolation between each output power return lines and input return line is higher than 1MΩ | | | | | OK | OK | | |
| E1.4 | Verify that AC isolation between each output power return lines and bonding pins is lower than 50nF | | | | | OK | OK | | |
| E1.5 | Verify that AC isolation between each output power return lines and input line is lower than 5nF | | | | | OK | OK | | |
| E1.6 | Verify that DC isolation between input power return line and chassis is higher than 1MΩ shunted by no more than 5nF | | | | | OK | OK | | |

12.CONCLUSIONS

The unit DC-DC Converter Board DPU-EM-300.00-0 S/N 03 was tested according to the specification and following the procedures DPU-PR-CGS-003 Issue 1. The results of the tests are contained in this document. All the measurements are in agreement with the specifications.
