Subject: AI 1 of H-P-ASP-MN-3961_SPIRE IF Meeting 18-11-03
Importance: Low

Mail ref : H-P-ASP-LT-4030

This closes the AI 1 of H-P-ASP-MN-3961_SPIRE IF Meeting 18-11-03, for ASP (Alcatel / Alenia will check that the SVM is designed with M5 screws for FCU interface, and if not will initiate the change.)

M5 applies only to FCU (ref RFD_SPIRE_FCU_n10, change for drawing SPIR-MX-5200 000 F inside pack issue 6). The change is included in the ASP CR 515 (with note indicating M5 for FCU) sent beginning October to ALS.

Note: the minutes H-P-ASP-MN-3961 says page 2:

"Alcatel / Alenia will check that the SVM is designed with M5 screws for FCU/DCU, and if not initiate the change"

"FCU/DCU" should have been replaced by "FCU": No screws change for DCU (drw SPIR-MX-5100 000 D inside pack issue 6: still last applicable).
