Subject: Goretex shield for External SPIRE cryoharness

Dear Sirs,

SPIRE requested ASED to cover the external instrument cryoharness by a non-conductive shield of GORE TEX.

This is non-compliant to the GDIR requirement GDEL-535 (ref. HP-1-ASPI-SP-0027).

Please confirm that we could give the instruction to our harness manufacturer not to manufacture this shield in order to keep compliance with the GDIR or provide a clear justification for this shield.

Please confirm until 12.02.04 the very latest.

This closes ASED Action Item from the last EMC Working Group meeting.

Kind regards

EADS ASTRIUM
