SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 3 of 38

## 1. INTRODUCTION

This acceptance test report is based on the tests carried out by SPIRE at RAL on the Herschel Common Science System (HCSS) version 0.3.6 build #1023 on 9<sup>th</sup>-17<sup>th</sup> Oct 2006. This acceptance test was part of a wider testing of the SPIRE EGSE in preparation for the fourth-phase testing of the proto-flight model of the instrument (PFM4). The documentation listed in section 2 was used for the execution of the tests. Section 3 describes the RAL system setup and configuration for these tests. In section 4 the results from the execution of each test are described.

### 1.1 Conventions

Commands entered are in indented courier new font:

```
dbuser -add -P egse@lichfield
```

Output from the system is in the same font but starting without indentation:

```
Exception in thread "main" java.lang.NullPointerException
    at herschel.cus.gui.CusEditor.<init>(CusEditor.java:98)
    at herschel.cus.gui.CusEditor.main(CusEditor.java:1332)
```

## 2. DOCUMENTATION

RD07	<a href="#">Mission Setup User's Guide</a>

## 3. TEST SETUP

### 3.1 System Setup

The SPIRE setup for the acceptance test was as follows.

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 4 of 38

**Lincoln:** SCOS 2000 w/s running Linux SuSE 7.3, SCOS2000 v2.3e P5 + TOPE, EGSE part of the TestControl. The sops23e account was used.

**Lichfield:** Data Server running Linux SuSE 9.3, plus test control support (tcl/tk 4.4.12, tcl thread 2.6.2, tclBlend 1.3.2), Versant 7.0.1.1. The sg55 account was used. SPIRE build #395 was installed.

**Salisbury:** QLA machine running Linux 9.3, Versant 7.0.1.1. SPIRE build #400 was installed, which has a QLA update to support prime and redundant instrument testing. The qla account was used.

Both Lichfield and Salisbury were installed with:

- Java 1.5.0\_09-b01
- HCSS build #1023 (HCSS 0.3.6 release, database schema version 25)

Note that we did install Versant 7.0.1.2, but due to errors with shared libraries, we rolled back to 7.0.1.1.

**Post-AT Note:** After the Acceptance Test was finished we noticed a crash in TM ingestion while reading an instrument model object from the database. In the hope of remedying this, we re-enhanced the CCM classes corresponding to HCSS build #1023 with Versant 7.0.1.1. This also looks like SPR-2415 even though data frames were not being produced...

## 3.2 Preliminary Steps

These steps were performed in order to carry out the acceptance test. They were carried out as required, i.e. they were not all performed before the acceptance test steps were started.

### 3.2.1 Router and Gateway

We started the Router and EGSEGateway from sg55 on Lichfield:

- `router R`
- `router S -scosapids 1280,1282,2036-2038`

### 3.2.2 Database setup

We used the DB Admin Manual HSCDT/TN044, Issue Draft 0.19, 29<sup>th</sup> Sept 2006, linked from the HCSS Documentation Tree. We were unable to find a version of this document specifically applicable to HCSS 0.3.6.

Create database for HCSS 0.3.6 AT:

```
/home/sg55> db_admin -i hcsvg0.3.6_at@lichfield
```

Command was successful and produced the following output:

```
/home/sg55> db_admin -i hcsvg0.3.6_at@lichfield
11-Oct-06 14:23:55.365 LogInitialiser: Initialising using local log
configuration
file /home/sg55/.hcsvg/userlogging.properties
11-Oct-06 14:23:55.423 Configuration: Build number is 1023
Initializing new database system...
[makedb] New database directory created: hcsvg0.3.6_at@lichfield
[profile.be] Updated profile.be for database: hcsvg0.3.6_at@lichfield
[createdb] New database created: hcsvg0.3.6_at@lichfield
[SchemaTool]
```

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 5 of 38

```
[indexing] Creating default indices.
11-Oct-06 14:24:02.762 DatabaseTools: Could not check for multi-user-
mode, check is disabled.
[DBI]
[initv]
Initializing database "hcssv0.3.6_at@lichfield"
11-Oct-06 14:24:03.046 ReplicatingTransaction: Initializing normal
Store: hcssv0.3.6_at@lichfield (main), shadowing disabled.
Initializing database using
herschel.ccm.tools.BasicMissionInitializer
11-Oct-06 14:24:03.134 InstrumentModelRegistryImpl: Create new model
registry for instrument HIFI
11-Oct-06 14:24:03.189 InstrumentModelRegistryImpl: Create new model
registry for instrument PACS
11-Oct-06 14:24:03.190 InstrumentModelRegistryImpl: Create new model
registry for instrument SPIRE
Database system initialization finished.
Finished.
```

We then checked the schema of the DB:

```
sg55/.hcss> schema_tool -v hcssv0.3.6_at
```

```
Database schema version = 25
Class schema version = 25
```

Checked the size and amount of free space in DB:

```
sg55/.hcss> dbtool -space -volume -all hcssv0.3.6_at
```

```
/home/sg55> dbtool -space -volume -all hcssv0.3.6_at
VERSANT Utility DBTOOL Version 7.0.1.1
Copyright (c) 1989-2005 VERSANT Corporation
```

```
Percentage of free space in DB : 99%
Total available free space in DB : 8368640KB
```

We checked to see if the db\_admin command had created any indexes:

```
/home/sg55> dbtool -index -info -list hcssv0.3.6_at
```

The command was successful (see Appendix A for the output).

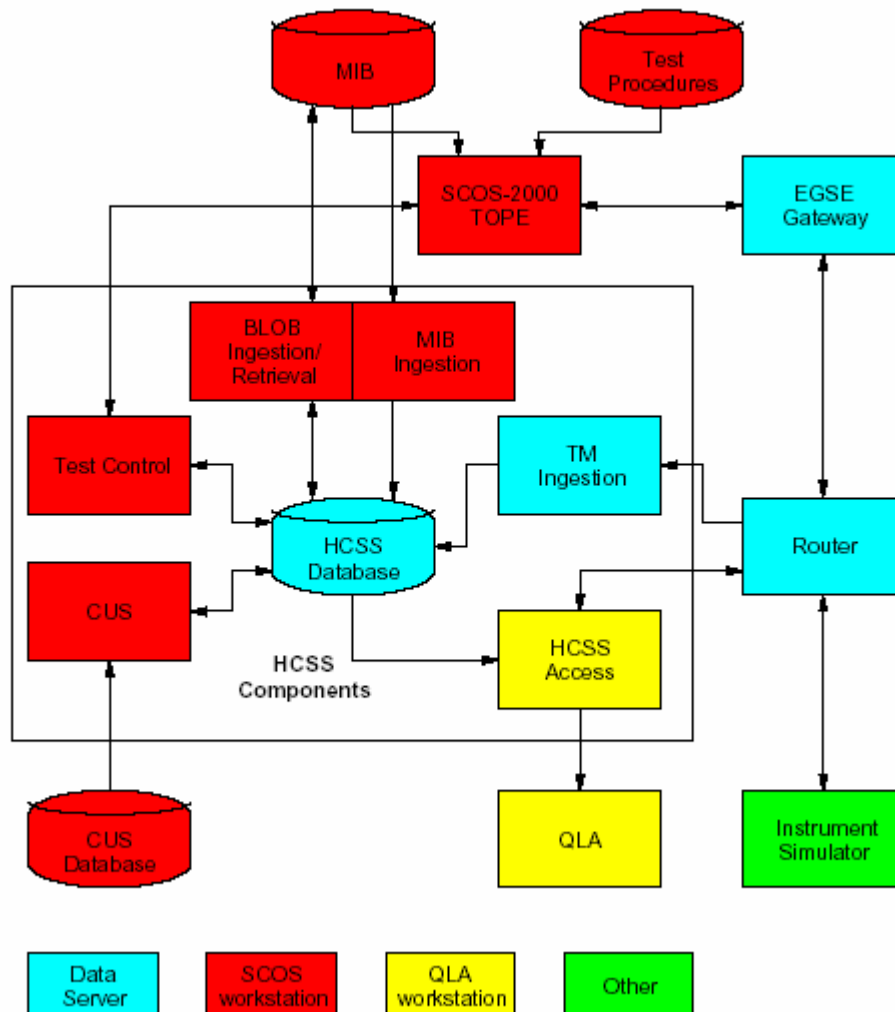

Figure 1: Configuration for the HCSS Acceptance Test

## 4. HCSS TEST CASES

### 4.1 TC-ICC-01: MIB Ingestion

The following steps were performed on lichfield:

- Checked that the siteid is set to 3 in the .hcss/user.props file
- Used old MIB in directory tree /home/sg55/MIB/PFM3\_Issue2.1.G1 and recursively copied files into new directory /home/sg55/MIB/HCSSv0.3.6\_AT
- Ran genmddurns

```
/home/sg55/MIB/HCSSv0.3.6_AT> genmddurns ascii-tables auxil/tc-
durns
Using ascii-tables/ccf.dat to create a TEMPLATE command duration
file auxil/tc-durns ..
Done.
```

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 7 of 38

- Ran the program to check the MIB

```
MIB/PFM3_Issue2.1.E1> mibchecker -properties
hcss.mib.datadir=$PWD > mib.log 2>&1 (using bash shell, i.e. typed
bash before executing this command)
```

The mibchecker ran successfully. (the warnings log is in Appendix B)

- Now we attempted to ingest the MIB into the DB:

```
MIB/PFM3_Issue2.1.E1> ingestmib -properties
hcss.mib.datadir=$PWD
```

The ingestmib reported the following error:

```
Exception in thread "main" herschel.mib.api.MibException: The
label "-properties" exists in the database.
    at
herschel.mib.utils.MibAndStore.writeToStore(MibAndStore.java:140
)
    at herschel.mib.tools.IngestMib.exec(IngestMib.java:67)
    at herschel.mib.tools.IngestMib.main(IngestMib.java:100)
```

The complete log from ingestmib is in Appendix C.

We accidentally used the wrong database (viz. asier\_temp@chichester) in our attempt to ingest the MIB. Changed the following two properties as follows:

```
var.database.server =lichfield
var.database.devel = hcssv0.3.6\_at@\${var.database.server}
```

Tried ingesting the MIB again. This time it appeared to ingest successfully, except that there was a strange message regarding the database label:

```
11-Oct-06 15:04:53.233 MibFactory: There was one or more problems in
the imported MIB files. These are not judged to be serious. Check the
file mibchecker.log for details.
11-Oct-06 15:04:53.233 MibFactory: Semantical checks done.
11-Oct-06 15:04:58.575 IngestMib: MibDefinitions now added to
database with label -properties
11-Oct-06 15:04:58.583 IngestMib: Ingestion Completed Successfully.
```

We started the CUS.

➤ cusgui&

From the MIB tab selected the “Load a new MIB” option. At this point a window popped up asking for a MIB to be selected. The only MIB available was called -properties. Selected this MIB and the definitions appeared in the “MIB Command Definitions” bottom-right panel. We did not yet commit the new MIB to the registry.

### Test partially successful.

**NCR-01:** MIB ingestion problem when -properties specified.

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 8 of 38

### 4.2 TC-ICC-02: CUS: TC Definition File Import

This test is obsolete as its purpose it now covered by TC-ICC-01.

### 4.3 TC-ICC-03: CUS: Observing Mode Import

We tried to ingest the calibration tables using a shell script using CUS command line functionality. This is located in `~sg55/CUSScripts/HCSSv0.3.6` and named `IngestCalTables.csh`.

```
Using database hcsvg0.3.6_at

13-Oct-06 09:43:47.942 Cus: Definitions successfully imported
```

We didn't commit these changes in order to also test the same operation using the CUS GUI. First the calibration tables were selected, "Upload table" from the menu, selected PSW\_PeakUp.txt and "Open". A dialog said "Calibration table exists, do you want to update it?", selected ok. This was confirmed as being successfully uploaded. Then we selected "View table", which prompted "Select a version of the table to display". Selected "version 1", which displayed it as expected.

We then selected "Registry", then "Import", and were prompted "Do you wish to create new versions". We clicked on "Yes", then selected the file containing the building block definitions: CUS\_BBlocks\_Definitions.txt. Confirmed "Definitions successfully imported".

We again selected "Registry", then "Import", then went to select the file CUS\_Modes\_Definitions.txt. Confirmed "Definitions successfully imported".

Finally we selected "Registry" and "Commit".

**Test successful.**

### 4.4 TC-ICC-04: TOPE: Issuing Telecommands

We imported test procedure TOPE\_test.tcl from directory  
/home/sops23e/SCOS2.3eP5/tcl/TC/HCSS\_AT\_Scripts/TestControlScripts  
We then ran this test procedure.

```

13-Oct-06 10:03:23.925 TchTclServer: Starting up the TCL server of
the TestControlHandler
13-Oct-06 10:03:24.290 ReplicatingTransaction: Initializing normal
Store: hcsvg0.3.6_at@lichfield (main), shadowing disa
bled.
13-Oct-06 10:03:24.360 MissionImpl: Using configuration "democonfig"
13-Oct-06 10:03:24.388 NativeMethodAccessorImpl: Successful startup,
the TestControlHandler TCL server is running!
13-Oct-06 10:08:23.189 TestControlHandlerImpl: Adding testProcedure
TOPE_HCSSTest (SPIRE)
```

Now we observed a "Definition "SET\_PHOT\_PHASE" not defined" error from the test control server. To try to understand what was happening, we checked out the source code for the CCM corresponding to build #1023, added some diagnostic messages to TestControlHandlerImpl and CommandSetImpl, then recompiled them. We also set the logging configuration to FINEST.

After consultation with Craig Porrett did the following:

1. From command line execute the command: *missetup -addconfig PFM3*

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 13 of 38

Result:

```
missetup -addconfig testconfig
16-Oct-06 13:36:11.439 LogInitialiser: Initialising using local log
configuration file /home/sg55/.hcss/userlogging.properties
16-Oct-06 13:36:11.484 Configuration: Build number is 1023
16-Oct-06 13:36:12.352 ReplicatingTransaction: Initializing normal
Store: hcsvg0.3.6_at@lichfield (main), shadowing disabled.
16-Oct-06 13:36:12.432 MissionSetup:
Using database "hcsvg0.3.6_at@lichfield"
16-Oct-06 13:36:12.684 MissionSetup: Mission configuration
"testconfig" created in database "hcss.ccm.mission.database"
```

2. Started the cugui and under Instrument Model tag selected Create Instrument Model in a configuration, on the pop up window selected mission configuration PFM3 then hit select.
3. Then committed changes.
4. On user.props file under Lichfield:/home/sg55/.hcss/ included the following property:

```
hcss.ccm.mission.config = PFM3
```

5. Restarted test control server and re-imported TOPE TCL scripts after configuration change.
6. Executed TOPE\_HCSSTest procedure. All commands are generated and sent to SCOS

### Test Successful.

*SPR-2419 was raised on the problems we encountered – to be closed by Asier.*

## 4.6 TC-ICC-06: End to End: Run a Test Observation, Ingest TM packets, run QLA

Starting this test involved the following actions:

1. TM ingestion failed to start giving the following error messages:  
ReplicatingTransaction: Initializing normal  
Store:hcsvg0.3.6\_at@lichfield (main), shadowing disabled.  
16-Oct-06 14:15:03.071 MissionImpl: Using configuration "PFM3"  
16-Oct-06 14:15:03.077 TmIngestion:  
herschel.tmingest.common.TmIngestionException:  
Configuration:Instrument not defined in database: Cannot run  
requested tm packet processor
2. Included properties for the three TM packet processors in user.props  
hcss.tmingest.tmpacketprocessor.hifi, hcss.tmingest.tmpacketprocessor.pacs and  
hcss.tmingest.tmpacketprocessor.spire.  
Originally these properties were all set to Y in the tmingestion.defaults properties file.  
Set them to N for HIFI and PACS and Y for SPIRE. TM ingestion still failed with error:  
cus -createinsmodel PFM3  
16-Oct-06 14:26:39.736 LogInitialiser: Initialising using local log  
configuration file /home/sg55/.hcss/userlogging.properties  
16-Oct-06 14:26:39.781 Configuration: Build number is 1023  
16-Oct-06 14:26:40.779 ReplicatingTransaction: Initializing normal  
Store: hcsvg0.3.6\_at@lichfield (main), shadowing disabled.  
16-Oct-06 14:26:40.893 MissionImpl: Using configuration "PFM3"  
16-Oct-06 14:26:40.899 Cus: An instrument model for SPIRE exists in  
this mission configuration.  
Use -f option to force replacement

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 14 of 38

Set `hcss.tmingest.tmpacketprocessor.spire` to N.

***In order to continue with the rest of the AT we decided to create a new AT database in order to replicate the process now in a more ordered manner:***

1. Removed the existing AT database and created it once again. Then repeated actions reported on TC-ICC-01.
2. Created a new configuration from command line: `missetup -addconfig iltconfig`
3. Opened CUS and selected Instrument Model → Create new Instrument Model ... → Selected the mission configuration previously defined ( iltconfig) and when it prompted (an instrument model for SPIRE exists, ... , do you want to replace it ) selected OK.
4. On the user.props updated the `hcss.ccm.mission.config` to point to iltconfig
5. Updated the instrument `hcss.mib.datadir` property on the user.props file for sg55 to point to the directory where MIB files for the AT were located.  
(/home/sg55/MIB/PFM3\_Issue2.1.G1/)
6. Then executed `ingestmib PFM3_Issue2.1.G2` command with the appropriate label for this MIB. Then on the CUS GUI loaded the new MIB by selecting Load a New Mib under the MIB tab. Then committed the changes.

***Continued now with the rest of the AT.***

Now started tmingestion by typing.

```
>tmingest HCSSv0.3.6_AT_TC_ICC_06.log
```

TM Ingestion started OK.

Logs being written to `~sg55/logs/tmingest` directory. Script tmingest to start TM ingestion is in `~sg55/bin`

3. Started QLA from `qla@salisbury`: success
4. Added OverNightTest definition in the CUS
5. Started TFTS

We then left it running with nominal housekeeping collection overnight. The following day we checked:

1. Telemetry ingestion log – no errors, warnings or exceptions spotted.
2. Messages on the Router and EGSE gateway konsoles - no errors or warnings.

**Test successful.**

### **4.7 TC-ICC-07: End to End: Run RTA/QLA on observation data stored in the HCSS database**

We started QLA from `qla@salisbury`.

- Made the test database publicly accessible (`dbuser -add -P hcsvg0.3.6_at`) from lichfield.

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

Ref: SPIRE-RAL-REP-002739  
Issue: 1.0  
Date: 6<sup>th</sup> Nov 2006  
Page: 15 of 38

Playback both by time and by test observation was performed. In both cases QLA displayed a time series plot of the DPUTEMPHK parameter.

**Test successful.**

### 4.8 TC-ICC-08: SPIRE Command List functionality in the CUS

Copied from /home/sg55/OBS-Tables/ Functions\_2.5\_1.2\_060302100140.tbl into the directory HCSSv0.3.6.

Within the table corrected small typo (CLname to CLName – this typo was present because we used the table output from an old version of the SPIRE VM compiler).

The table was created using BBID 100 successfully.

**We checked that the length of the update table commands within the building block is a maximum of 56 32 bit data words as opposed to 57 23 bit data words.**

Definition committed to the database.

We repeated the process for flash table command list with BBID 101. Also successfully created and committed.

**Test successful.**

### 4.9 TC-ICC-09: Ingest a Calibration Table and check size functionality in the CUS

We tried the calibration table ingestion in two possible ways:

1. Ingest the calibration table(s) using a shell script which makes use of CUS command line functionality. This is located in `~sg55/CUSScripts/HCSSv0.3.6` and named `IngestCalTables.csh`. The calibration table was ingested successfully.
2. Ingest the same calibration table(s) using the CUS GUI functionality.

In both cases the process was verified by selecting View Calibration Table from the CUS GUI.

With the CUS GUI we created a short procedure (CheckTableSize) which would print the table size for PSW\_Peakup. We ingested it, ran it, and verified that the size was correct.

**Test successful.**

### 4.10 TC-ICC-10: Correct setting of the OBSID values according to Site Id in the CUS

This was verified using the “Check Command” button of the CUS GUI.

**Test successful.**

### 4.11 TC-ICC-11: Correct setting of command parameter values in the CUS

This was verified using the “Check Command” button of the CUS GUI.

Command parameters (hexadecimal values) are displayed correctly.

**Test successful.**

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 16 of 38

### 4.12 TC-ICC-12: TC History and OOL data retrieval and ingestion

We tested in ILT client-server mode. We did not test the manual (IST) mode due to difficulties running the GUI program on the same machine as the test control server.

On lincoln we ran:

```
sg55> thfserver  
sg55> orfserver
```

We then selected the times on the client (lichfield) by setting the “starttime” properties. On the client machine we ran:

```
17-Oct-06 10:51:09.167 TCHAssociator: Missing TCH record(s): id = 1  
last one was 146 at Mon Oct 16 15:55:11 BST 2006  
17-Oct-06 10:51:09.713 AbstractFileIngestion: 439 records entered  
into the database  
17-Oct-06 10:51:09.713 TCHIngestion: Ingestion complete, elapsed time  
3542 milliseconds  
17-Oct-06 10:51:09.715 FileDetails: Setting start time to Tue Oct 17  
09:51:05 UTC 2006  
17-Oct-06 10:51:09.716 AbstractFileIngestion: Waiting for 60000 ms  
17-Oct-06 10:52:09.717 TCHIngestion: File ingestion begun at Tue Oct  
17 10:52:09 BST 2006  
17-Oct-06 10:52:10.236 AbstractFileIngestion: Ingesting file  
THF_061017_0018.DAT6761.tmp  
17-Oct-06 10:52:10.237 AbstractFileIngestion: File received covering  
Thu Jan 01 00:00:00 UTC 1970 to Thu Jan 01 00:00:00 UTC 1970  
17-Oct-06 10:52:10.238 AbstractFileIngestion: Time of first item in  
file (Thu Jan 01 00:00:00 UTC 1970) differs from the requested file  
start time (Tue Oct 17 09:51:05 UTC 2006) by more than the allowed  
margin (1000)  
17-Oct-06 10:52:10.239 AbstractFileIngestion: Time of last item in  
file (Thu Jan 01 00:00:00 UTC 1970) differs from the requested file  
end time (Tue Oct 17 09:52:05 UTC 2006) by more than the allowed  
margin (1000)  
17-Oct-06 10:52:10.239 THFProcessor: Processing file  
THF_061017_0018.DAT6761.tmp  
17-Oct-06 10:52:10.246 THFProcessor: The file contains 0 TCs of which  
0 are unknown (manual)  
17-Oct-06 10:52:10.248 AbstractFileIngestion: 0 records entered into  
the database  
17-Oct-06 10:52:10.249 TCHIngestion: Ingestion complete, elapsed time  
531 milliseconds  
17-Oct-06 10:52:10.249 FileDetails: Setting start time to Tue Oct 17  
09:52:05 UTC 2006  
17-Oct-06 10:52:10.249 AbstractFileIngestion: Waiting for 60000 ms
```

We used db2tty to check that the same number of records had been entered into the database as expected.

We repeated the ingestion and found that the TCH records were ingested into the database again, even though they were already there (and log messages said so).

```
17-Oct-06 10:57:33.439 THFProcessor: TCH with time stamp Mon Oct 16  
17:16:41 BST 2006 cannot be associated with an observation
```

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

Ref: SPIRE-RAL-REP-002739  
Issue: 1.0  
Date: 6<sup>th</sup> Nov 2006  
Page: 17 of 38

17-Oct-06 10:57:33.440 THFProcessor: TC 291 already has a TCHistory in database  
17-Oct-06 10:57:33.441 THFProcessor: TCH with time stamp Mon Oct 16 17:16:42 BST 2006 cannot be associated with an observation  
17-Oct-06 10:57:33.443 THFProcessor: TC 292 already has a TCHistory in database  
17-Oct-06 10:57:33.443 THFProcessor: The file contains 439 TCs of which 1 are unknown (manual)

We then repeated the same tests for OOL. In this case the OOL records were not reingested.

**NCR-02:** TC History ingestion includes same record more than once.

### [AAA 1<sup>st</sup> November 2006]:

After 3 days of the TC history and OOL history processes being started the TCH ingestion process crashed on 20<sup>th</sup> Oct 2006, hanging at the same time as the OOL ingestion process. Details of the error on the particular TC history record that caused it can be found on **SPR-2456**.

The same error was notified on SPR-1689. On that occasion we could not reproduce the error. Now we have a sample of the file that will produce the error. This is a file filled with certain number of blank spaces which TCH ingest application seems unable to detect as invalid, hence producing an application error.

**Test not successful.**

**NCR-03:** TC History ingestion crashes

### 4.13 TC-ICC-13: Overnight test at nominal SPIRE data rate

This test was not performed because no instrument simulator was available at the time. This will be tested during the instrument warm functional tests.

### 4.14 TC-ICC-14: Database Replication Test

This test was not performed as it is not planned to use this functionality during the test campaign.

### 4.15 TC-ICC-15: Playback data from database into the EGSE router

This test was not performed as it is:

1. Not needed for the test campaign.
2. Difficult to perform without corrupting the SCOS telemetry history.

## 5. CONCLUSIONS

The Acceptance Test of HCSS 0.3.6, build #1023 was partially successful, with some important anomalies observed. HCSS v0.3.6 can still be used for our ILT but it does mean that some activities have to be performed manually after the tests.

Table 1 below lists all the Non Conformance Reports (NCRs) resulting from these tests and our response in each case.

## Report

SPIRE HCSS v0.3.6 Acceptance Test Report  
Sunil Sidher, Steve Guest & Asier Aramburu

**Ref:** SPIRE-RAL-REP-002739  
**Issue:** 1.0  
**Date:** 6<sup>th</sup> Nov 2006  
**Page:** 18 of 38

**Table 1 List of NCRs raised during the acceptance test**

<b>NCR Details</b>	<b>Action taken</b>
<b>NCR-01:</b> MIB ingestion problem when - properties specified.	HCSS SPR-2428 raised.
<b>NCR-02:</b> TC History ingestion includes same record more than once.	None. This is the specified behaviour, see HCSS SPR-0503.
<b>NCR-03:</b> TC History ingestion crashes when invalid record is found	HCSS SPR-2456 raised.

### **Important Post Acceptance Test Remarks:**

- **For our instrument level tests with large number of TCs (viz. >1000), there is a delay of up to a minute between the Start of test execution from TOPE and the actual release of TCs to the instrument. This important anomaly, which was not present in HCSS v0.3.3, needs further investigation.**
- **In the HCSS v0.4 acceptance test plan we will need to include test cases for switching between instrument models and configurations.**
- **It would be very helpful if the CUSGUI displayed all the current mission properties as setup by the user, i.e. Instrument Model, Configuration and DB (HCSS SCR-2478).**
