13. Joke of the Month		
<p>Dear Tech Support,</p> <p>Last year, I upgraded from Boyfriend 5.0 to Husband 1.0 and noticed that the new program began making unexpected changes to the accounting modules, limiting access to flower and jewelry applications that had operated flawlessly under Boyfriend 5.0.</p> <p>In addition, Husband 1.0 uninstalled many other valuable programs, such as Romance 9.9 but installed undesirable programs such as CHAMPIONS LEAGUE 5.0 and NBA 3.0. Conversation 8.0 no longer runs and HouseCleaning 2.6 simply crashes the system. I've tried running Nagging 5.3 to fix these problems, but to no avail. Help!</p> <p>Signed, Desperate Wife</p> <p>Dear Desperate Wife,</p> <p>Keep in mind that Boyfriend 5.0 is an entertainment package, while Husband 1.0 is an operating system. Try entering the command: C:/I THOUGHT YOU LOVED ME and install Tears 6.2. Husband 1.0 should then automatically run the following applications: Guilty 3.0 and Flowers 7.0. But remember, overuse can cause Husband 1.0 to default to GrumpySilence 2.5, Happyhour 7.0, or Beer 6.1. Beer 6.1 is a very bad program that will create "Snoring Loudly" wave files.</p> <p>DO NOT install MotherInLaw 1.0 or reinstall another Boyfriend program. These are not supported applications and will crash Husband 1.0. Remember also that while Husband 1.0 is a great program, it does have limited memory and cannot learn new applications quickly.</p> <p>You might consider buying additional software to improve performance. I personally recommend HotFood 3.0, Lingerie 5.3 and NiceBody 10.1.</p> <p>Sincerely, Jim</p>
