## Procedure Summary

### Objectives

The objective of this Herschel ACMS procedure is to switch ON and verify the health of the Main Star Tracker (STRM) in SAM in order to enable a transition to OCM or SCM.

The procedure involves the following activities:

- verification of initial status of the spacecraft and FAs
- identification and switch ON of the designated STR  
(calls H\_FCP\_AOC\_4S11 for STR1)  
(calls H\_FCP\_AOC\_4S21 for STR2)
- verification of STRM status, consistency and stability

After launch the STR will be off, likewise after each autonomous entry to SAM, the STR will have been switched off by the ACC ASW to save power. Before leaving SAM, the STR has to be made operational again to allow a safe transition to either SCM or OCM for re-orientation or deltaV manoeuvre.

Note that a detailed performance assessment can only be done after entry in SCM.

### Summary of Constraints

Main constraints:

- Ground contact to monitor the progress is assumed.

### Spacecraft Configuration

#### Start of Procedure

Spacecraft initial conditions:

- ACMS mode SAM/Point
- STRM switched OFF

#### End of Procedure

Spacecraft final conditions:

- ACMS mode SAM/Point
- STRM switched ON and in ATFAD/AAD mode

Step No.	Time	Activity/Remarks	TC/TLM	Display/ Branch
<b>Beginning of Procedure</b>				
PROC Procedure Properties				
SSID :				
1		Check S/C Initial Status		Next Step: 2
1.1		Check S/C mode status		<input type="checkbox"/>
		Verify Telemetry SpacecraftMode                      AESME002	= Nominal	AND=ZAA01999
		Verify Telemetry AcmsMode                                      AESMG002	= SAM	AND=ZAA01999
		Verify Telemetry AcmsSubstate                                      AESMF002	= SAM Sun Point	AND=ZAA01999
1.2		Check Star Tracker status, configuration & health		<input type="checkbox"/>
		Verify Telemetry STR1 power                                      AE4P1002	= OFF	AND=ZAA00999
		Verify Telemetry STR2 power                                      AE4P2002	= OFF	AND=ZAA00999
		Verify Telemetry Curr STR in use                                      AES18002	= STR 1 = STR 2	AND=ZAA01999
		Verify Telemetry STR1 Health Sts                                      AES31002	= Healthy	AND=ZAA01999
		Verify Telemetry STR2 Health Sts                                      AES32002	= Healthy	AND=ZAA02999
2		IF SRT1 is declared as Main		Next Step: THEN 3 ELSE 4
3		Make STR1 operational as main (H_FCP_AOC_4S11)		Next Step: 5
		Execute Procedure: H_FCP_AOC_4S11 Make STR1 operational as main		

Declare STR Operational

Step No.	Time	Activity/Remarks	TC/TLM	Display/ Branch
4		Make STR2 operational as main (H_FCP_AOC_4S21)		Next Step: 5
		Execute Procedure: H_FCP_AOC_4S21 Make STR2 operational as main		
5		Verify attitude quaternion within range		Next Step: 6
		The attitude quaternion (STR quaternion transformed to body frame and corrected for misalignments) should be within a strip of the celestial sphere around the Sun vector, taking into account the limited cycle size in SAM. Expressed in the angle $\phi$ about the X axis and the angle $\theta$ between the Sun Vector and the body YZ plane, this strip is: $ \phi  < 5\text{deg}$ and $ \theta  < 30.6\text{deg}$		
		An alternative would be to : 1. check the attitude of the STR boresight axis. In this case no transformation of STR quaternion to body frame is needed and the allowed zone would be a strip of +5deg centred on a great circle orthogonal to the Sun vector. 2. check the attitude of the Z axis after a transformation from STR to body. The allowed zone would be a 5 deg cone.		
		Verify Telemetry Est Attitude Q1                      AESA6001		AND=AA01X109
		Verify Telemetry Est Attitude Q2                      AESA7001		AND=AA01X109
		Verify Telemetry Est Attitude Q3                      AESA8001		AND=AA01X109
		Verify Telemetry Est Attitude Q4                      AESA9001		AND=AA01X109
6		Check consistency versus estimated rates		Next Step: 7
		Verify Telemetry STRM Att Q1                      AEXA1001		AND=AA01X109
		Verify Telemetry STRM Att Q2                      AEXA2001		AND=AA01X109
		Verify Telemetry STRM Att Q3                      AEXA3001		AND=AA01X109
		Verify Telemetry STRM Att Q4                      AEXA4001		AND=AA01X109
		Check estimated angular rates
