

Delete OBCP
File: H_FCP_OBS_7102.xls
Author: lstefanov-hp

Procedure Summary

Objectives

This Herschel OBSM nominal procedure is used to delete an OBCP stored in SSMM on-board. The corresponding entries are removed from both on-board (when TC(18,2) is executed) and ground (using OCL compiler command) Symbol Tables.

Summary of Constraints

An OBCP can be deleted only if its status is 'Stopped.'

The ASW function "OBCP Management" is responsible of deleting OBCPs. No OBCP can be deleted when the function is Stopped.

Default status of the function: "Stopped".

When the function is stopped, it does not accept any other telecommands than the:

- Start Function TC(8,1,107);
- Report Function Status TC(8,5,107).

Thus, if the function is stopped this procedure cannot be executed.

Spacecraft Configuration

Start of Procedure

CDMU in Nominal configuration, that is:

- PM A or B ON (nominally A)
- TM Encoder/OBT A or B active (nominally A)
- RM A and B enabled
- MM A and B ON

"OBCP Management" function Stopped or Running

End of Procedure

CDMU in Nominal configuration:

- PM A or B ON (nominally A)
- TM Encoder/OBT A or B active (nominally A)
- RM A and B enabled
- MM A and B ON

"OBCP Management" function Running
Selected OBCP deleted
